

ACS712 30A Range Hall Current Sensor Module ACS712 Module For Arduino

Specification:

- 1.The current sensor chips: ACS712ELC-30A;
- 2.Pin 5V power supply, on-board power indicator;
- 3.The module can measure the positive and negative 30 amps, corresponding to the analog output 66mV / A;
- 4.No test current through the output voltage is $VCC / 2$;
- 5.PCB board size: 31 (mm) x13 (mm);
